DESIGN X CODE

My app had five screens in Figma and twenty on a real phone

Philip Nosike · 5 min read

The screens nobody designs

1. Offline: what still works, and how do you say so without scaring anyone?
2. Slow: a grey outline of the page feels faster than a spinning circle.
3. Half-loaded: the text arrived, but one image didn't.
4. First visit vs. returning: the same screen with two very different jobs.

DESIGN X CODE

A design isn’t finished when it looks right. It’s finished when it still feels right on a bad connection.
