DESIGN SYSTEMS

The day I realised my developer didn't understand my Figma file

Philip Nosike · 4 min read

Names are the cheapest documentation you'll ever write

1. Name things by their job, not their look: "PaymentSummary," not "BlueCard."

2. Agree on one word with your developer and use it in both Figma and code.

3. Use variants for state and size: default, pressed, disabled; small, medium, large.

4. If a name needs explaining, it's the wrong name.

DESIGN SYSTEMS

A design system is a shared language. The names are its vocabulary.
