Professional Summary

Product Designer with 3+ years of industry experience designing end-to-end digital products across fintech, edtech, and consumer platforms for African and international markets. Skilled in UX research, user flows, wireframing, high-fidelity prototyping, and Figma-based design systems. Works closely with engineers and stakeholders in agile teams to deliver products that are intuitive, inclusive, and consistent at scale.

Skills

Product Design: Product Design, UX Design, UI Design, UX Research, User Flows, Journey Mapping, Wireframing, Prototyping, Information Architecture, Responsive Web Design, Mobile App Design

Design Systems & Brand: Design Systems, Component Libraries, Design Tokens, Brand Identity, Style Guides, Typography, Colour Systems, Data Visualization

Tools: Figma (Auto Layout, Variables, Components, Variants), Adobe Illustrator, Adobe Photoshop, Adobe InDesign, Blender 3D

Collaboration: Cross-Functional Collaboration, Stakeholder Management, Design Reviews, Developer Handoff, Agile

Languages: English (Fluent)

Professional Experience

Product Designer

Altioris Technologies | October 2026 – Present

- Design end-to-end product experiences, from user flows and wireframes to high-fidelity prototypes and developer-ready Figma files.

- Translate business requirements and user needs into clear design solutions in collaboration with stakeholders and engineers.
- Apply and extend design system components and tokens to maintain visual and interaction consistency across product surfaces.
- Take part in design reviews and agile sprints, iterating on designs based on team and stakeholder feedback.
- Document component behaviour and review builds with engineers to ensure implementation matches the design.

Lead Product & Brand Designer

Hillcross College, Remote | September 2025 – Present

- Led the end-to-end redesign of a fintech product (Hillcross Pay to KOYNX), defining the product vision, brand identity, and UX across web and mobile from discovery through delivery.
- Designed scalable UI component systems for edtech products, reducing design-to-development handoff time and keeping visual design consistent across multiple product surfaces.
- Partnered with international stakeholders to run product reviews, align on design direction, and deliver culturally inclusive experiences for South African users.

Lead Product Designer

Dlho Solutions, Abuja, Nigeria | November 2023 – September 2026

- Architected and maintained a multi-product design system, including tokens, components, and usage documentation, serving as the single source of truth for all product teams.
- Owned design quality across the full product lifecycle, from UX research and wireframes to pixel-perfect, developer-ready Figma files with documented component behaviour.
- Championed consistent design standards in agile sprints, leading design reviews and working closely with engineers to ensure implementation fidelity.

Freelance Product & Brand Designer

Noskshade (Self-Employed), Remote | January 2021 – Present

- **Bliss Bill (March – April 2024):** Designed the end-to-end product experience for a fintech application, covering UX flows, UI design, brand identity, and developer-ready handoff.

- **Laudromate (2023):** Designed the full product experience for an on-demand laundry app, covering UX flows, UI design, brand identity, and onboarding, from concept to handoff.
- **Wemove (2023):** Delivered end-to-end product design for a gamified sports and fitness app targeting the African market, including competitive research, UX strategy, and a visual system.
- **Mercury Magazine (2022):** Owned visual and UX design for a digital media platform, keeping design consistent across responsive web layouts and editorial content templates.

Selected Projects

KOYNX: Fintech Rebrand of Hillcross Pay | January – April 2026

Mobile App, Web Platform, Brand Identity

- Led the full rebrand and redesign of Hillcross Pay into KOYNX, overhauling the visual identity, UX architecture, and cross-platform design system to position the product for a broader market.

Eatfootball: Sports Prediction Platform | June – August 2025

Web App, Marketing Site, Admin Dashboard

- Sole designer for the complete product ecosystem: the consumer web app, the public marketing site, and an internal admin dashboard with data visualization components.
- Built a production-ready Figma design system with advanced components, variants, and auto layout, enabling consistent UI across all product touchpoints at scale.

Hillcross Pay: Fintech Product (Original Build) | June – August 2025

Mobile App, Web Platform, Brand Identity

- Designed the original Hillcross Pay financial services product from the ground up, delivering brand identity, UX architecture, and a cross-platform visual system covering secure transaction flows and data visualization.

Education

Bachelor of Science in Applied Biology

Godfrey Okoye University, Enugu, Nigeria | 2017 – 2021

Certifications

- UI/UX Design and Front-End Development Program
- ALX Virtual Assistant Intensive Program
